

INSTALLATION AND FIELD SPLICING

RAPID, RELIABLE SERVICE FOR ESCALATOR HANDRAILS

CERTIFIED SERVICES

Semperit is one of the world's leading producers of handrails for escalators and moving walkways. In addition to manufacturing high-quality handrails, Semperit can provide you with on-site escalator handrail installation and field splicing services that save you time and money and reduce escalator down time.

HIGH-QUALITY HANDRAILS

Semperit handrails offer you excellent quality, dimensional stability, and outstanding reliability. Our handrails are produced according to current state-of-the-art technologies, and our R&D specialists ensure the value of our products by using high-grade materials.

INSTALLATION AND FIELD SPLICING SERVICES

Certified technicians and service partners are locally available to offer you on-site escalator handrail installation and field splicing services. Service technicians provide reliable, quality work performed by experienced union splicers.

GLOBAL NETWORK OF CERTIFIED SERVICE PARTNERS

- Our network of technicians undergo special training to install and vulcanize Semperit and OEM handrails.

- Local technicians are available on short notice for on-site service or vulcanization.

- Rapid-response field splicing services save time and labor, and minimize the costs of down time.

- No matter where you are, our international distribution and service network are always available for you.

HANDRAIL REPLACEMENT

When a handrail needs replacement, it is imperative that the replacement is done quickly and done right. Escalator downtime causes transportation disruption and can lead to costly fees. Replacements of endless, or continuous, handrails require a complete disassembly and reassembly process which leads to extensive union labor, increased replacement time, and directly impacts escalator down time. Semperit offers field splicing services from certified technicians as an alternative to endless handrails.

ADVANTAGES OF ON-SITE FIELD SPLICING

- Does not require full escalator disassembly
- Reduces the number of technicians needed on site
- Cuts replacement time down significantly compared to endless handrail replacements
- Pull and splice technique avoids mis-measurements of rail and ensures accurate final measurements

BENEFITS OF SEMPERIT SERVICES

- Experienced and certified union technicians
- Fast service to minimize downtime
- In-stock materials are ready and available
- Safe, quality, high performance handrails

Endless Rail Replacement	Field Splice Replacement
3 Technicians or more	1-2 Technicians
12 hours/rail or more	4-5 hours/rail
Precise measurements required prior to service	Final length is cut on-site allowing correction of over-measurement errors
Cost fluctuation caused by uncertainties, issues, or errors	Precise estimates of materials, labor, and downtime

1) Service partners work independent from Semperit. Semperit does not make any expressed warranty or take liability for their performance. 2) All transactions with Semperit are subject to our General Terms and Conditions, which can be found at www.semperitgroup.com under Terms & Conditions 3) All specifications, numbers, calculations, test values, and data mentioned here – which are the basis for our customer consultation – are in accordance with the latest engineering standards. As the operating conditions have an influence on product application, it is the sole responsibility of the customer to check the application conditions of each individual case, and whether the specified quality criteria of our products are adequate for the intended purpose.
